Healthcare costs

Healthcare spend in the USA has hit \$3.8 trillion, more than 17% of GDP or \$10,000 per person per year. Healthcare costs have escalated at more than 8% per year since 1960, despite this outcomes remains poor relative to spend. With the rise of the affordable care act ("ACA" or Obamacare), opportunities have been created to innovate in healthcare and deliver and capture real value for entrepreneurs and companies.

Wealthier economic

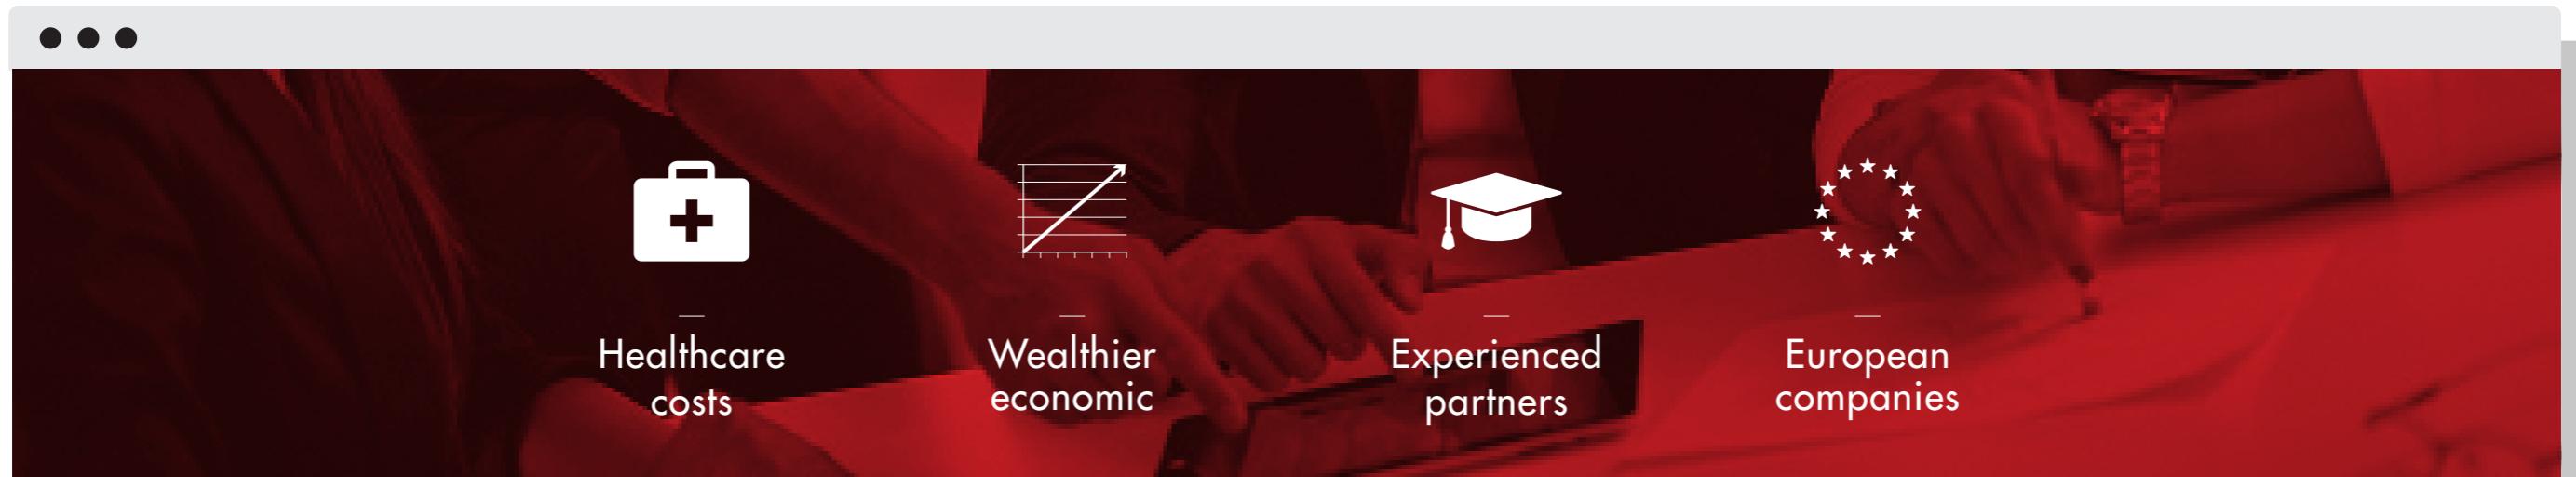

In emerging economies, healthcare spend is forecast to grow by more than 10% CAGR[5] over the next 8 years as the economies become wealthier and the population grows.

Experienced partners

Bakri Capital partners co-invest in disruptive healthcare venture. Our partners are all experienced healthcare entrepreneurs, executives, academics or public health officials who co-invest and assist companies.

European companies

We invest between \$250K and \$50M dollars in health care companies. Our focus is European companies looking to expand to North America we focus on late venture and early growth stages and will seed if invest in conjunction with leading institutions. We seek to be co-investors and generally do not take board seats but will lead investments in exceptional circumstances. We will also invest in healthcare services ven-
